Improving adhesion	<b>NewV sup Adhesion Promoter</b>	Can improve cold foil lamination and lamination properties.	<b>60U1012</b>	max. 10%
Defoaming agent	<b>NewV sup Defoamer</b>	Reduces foam.	<b>60U1013</b>	max. 0,5%

### Food and confectionery packaging

The products listed above are not suitable for printing primary food packaging or secondary packaging where the primary layer is not a barrier against migration of substances from the printed layer to the packed product. More information on the subject of packaging for food, cosmetics, pharmaceutical products, tobacco can be found in the information sheet *50.G.002 NewV for food packaging*. Please also find information on the webpage of the European Printing Ink Association: [www.eupia.org](http://www.eupia.org).

### Shelf life

The minimum shelf life of these products is 6 months from the production date if the container is not opened. But dependent on the storing and handling conditions, they can be usable much longer. For extending the warranty period, please contact our sales representatives.

Further information: Store between 5 - 25°C. Higher storage temperature may reduce shelf life. Protect from frost and sunlight. The cans need to be closed back immediately after usage.

## **Packaging**

1kg one-way plastic bottle

Washup solution:

10kg one-way plastic can

200kg one-way plastic barrel
